aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, sustainable investments score positively on Robeco's SDG Framework, and therefore do not cause significant harm.

Hoe is rekening gehouden met de indicatoren voor ongunstige effecten op duurzaamheidsfactoren?

A detailed description of the incorporation of principal adverse impacts is available via Robeco's Principal Adverse Impact Statement published on the Robeco website. In this statement, Robeco sets out its approach to identifying and prioritizing principal adverse impact, and how principal adverse impacts are considered as part of Robeco's investment due diligence process and procedures relating to research and analysis, exclusions and restrictions and/or voting and engagement. For sustainable investments, the PAI indicators have been taken into account by ensuring that the investments do no significant harm to any environmental or social objective. For this purpose, many PAI indicators are either directly or indirectly included in Robeco's SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

Hoe zijn de duurzame beleggingen afgestemd op de OESO-richtsnoeren voor multinationale ondernemingen en de leidende beginselen van de VN inzake bedrijfsleven en mensenrechten? Gedetailleerde beschrijving:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy as well as Robeco's SDG Framework.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behavior of companies. Robeco continuously screens its investments for breaches of these principles. In case of a breach, the company will be excluded or engaged with, and is not considered a sustainable investment. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

De belangrijkste ongunstige effecten zijn de belangrijkste negatieve effecten van beleggingsbeslissingen op duurzaamheidsfactoren die verband houden met ecologische en sociale thema's, arbeidsomstandigheden, eerbiediging van de mensenrechten, en bestrijding van corruptie en van omkoping.

In de EU-taxonomie is het beginsel "geen ernstige afbreuk doen" vastgesteld, dat inhoudt dat op taxonomie afgestemde beleggingen geen ernstige afbreuk mogen doen aan de doelstellingen van de EU-taxonomie en dat vergezeld gaat van specifieke EU-criteria.

Het beginsel 'geen ernstige afbreuk doen' is alleen van toepassing op de onderliggende beleggingen van het financiële product die rekening houden met de EU-criteria voor ecologisch duurzame economische activiteiten. Bij de onderliggende beleggingen van het resterende deel van dit financieel product wordt geen rekening gehouden met de criteria van de Europese Unie ten aanzien van duurzame economische activiteiten en het milieu.

Andere duurzame beleggingen mogen ook geen ernstige afbreuk doen aan milieu-of sociale doelstellingen

Wordt in dit financiële product rekening gehouden met de belangrijkste ongunstige effecten op duurzaamheidsfactoren?

Ja,

The Sub-fund considers principal adverse impacts on sustainability factors as referred to in Annex I of the SFDR Delegated Act.

Pre-investment, the following principal adverse impacts on sustainability factors are considered:

- Via the applied normative and activity-based exclusions, the following PAIs are considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1)
- Via the environmental footprint performance targets of the Sub-Fund, the following PAIs are considered:
 - Carbon footprint (PAI 2, Table 1)
 - Water and waste indicators (PAI 7-9, Table 1). Robeco will use on water and waste footprint until data quality and coverage of the PAIs will improve.

Post-investment, the following principal adverse impacts on sustainability factors are taken into account:

- Via the application of the voting policy, the following PAIs are considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs are considered:
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of the Sub-fund that cause adverse impact might be selected for engagement.

More information is available via Robeco's Principal Adverse Impact Statement, published on Robeco's website. The Sub-fund will periodically report how it has considered the principal adverse impacts of its investments in the Company's annual report, which will be made available each year on or before 30 April at the Sub-fund page highlighted in final section of this document.

Welke beleggingsstrategie hanteert dit financiële product?

Robeco QI Global Conservative Equities is an actively managed fund that invests in low-volatility stocks in developed and emerging countries across the world. The selection of these stocks is based on a quantitative model as described in the Investment policy strategy paragraph in Appendix I of this Prospectus. Conservative refers to the focus on equities that show a lower expected volatility than average global equity.

The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process.

Amongst others, the Sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

The Sub-fund has the following binding elements:

1. All equity holdings have a granted right to vote and Robeco exerts that right by voting according to Robeco's Proxy Voting Policy, unless impediments occur (e.g. share blocking). Robeco's Proxy Voting Policy can be found at <https://www.robeco.com/docm/docu-robeco-stewardship-policy.pdf>.
2. The Sub-fund's portfolio complies with Robeco's Exclusion Policy (<https://www.robeco.com/docm/docuexclusion-policy.pdf>), that is based on exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. This means that the Sub-fund has 0% exposure to excluded securities, taking into account a grace period. Information with regards to the effects of the exclusions on the Sub-fund's universe can be found at <https://www.robeco.com/docm/docu-exclusion-list.pdf>

4. The Sub-fund scrutinizes investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. If a company in the portfolio breaches one of the international guidelines during the investment period, the company will become part of the Enhanced Engagement program. When engagement is deemed highly unlikely to succeed, the company might be excluded directly.
5. The Sub-fund's weighted average ESG score is better than that of the general market index.

● **Wat is het toegezegde minimumpercentage voor het beperken van de beleggingsruimte overwogen vóór de toepassing van die beleggingsstrategie?**

The Sub-Fund does not commit to a minimum rate to reduce the scope of investments prior to the application of the investment strategy.

● **Wat is het beoordelingsbeleid voor praktijken op het gebied van goed bestuur van de ondernemingen waarin is belegd?**

The policy describes how Robeco determines if and when a company does not follow good governance practices and is therefore excluded from the initial investment universe for Article 8 and 9 products. Robeco's Good Governance policy applies to the Sub-fund and tests on a set of governance criteria that reflect widely recognized industry-established norms and include topics as employee relations, management structure, tax compliance and remuneration. - **de kapitaaluitgaven** (CapEx), die laten zien welke groene beleggingen worden gedaan door de ondernemingen waarin is belegd, bv. voor een transitie naar een groene economie;

At least 90% of the investments are aligned with the E/S characteristics of the Sub-fund. The Sub-fund plans to make a minimum of 50% sustainable investments, measured by positive scores via Robeco's SDG Framework. The investments in the category Other, estimated between 0-10%, are mostly in cash and cash equivalents. The planned asset allocation is monitored continuously, and evaluated on a yearly basis.

Op welke wijze voldoet het gebruik van derivaten aan de ecologische of sociale kenmerken die het financiële product promoot?

The Sub-fund may make use of derivatives for both hedging, liquidity and efficient portfolio management as well as investment purposes. Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options and currency forwards. Whilst the Subfund may use derivatives both for investment purposes as well as for hedging and efficient portfolio management, it does not utilize derivatives for such purposes outside the intended share of investments allocated to the 'Other' category.

In welke minimale mate zijn duurzame beleggingen met een milieudoelstelling afgestemd op de EU-taxonomie?

0%. The Sub-fund does not intend to make Taxonomy-aligned investments. It cannot be excluded that among the Sub-fund's holdings certain investments are Taxonomy aligned. The Sub-fund will report on Taxonomy-aligned investment in the periodic disclosures. In the future, once data-availability in relation to the EU Taxonomy will improve, Robeco might consider setting a target based on turnover or CAPEX. Robeco currently relies on third-party data, including data in relation to companies that do not disclose on the EU Taxonomy alignment of their activities. EU Taxonomy-alignment data

Wat is het minimaal aandeel duurzame beleggingen met een milieudoelstelling die niet zijn afgestemd op de EU-taxonomie?

The Sub-fund intends to make sustainable investments, measured as positive scores via Robeco's SDG Framework. Among those could be investments with environmental objectives that do not qualify as Taxonomy-aligned. The environmental objectives of the Sub-fund are attained by investing in companies that score positively on SDG 12 (Responsible consumption and production), SDG 13 (Climate action), SDG 14 (Life below water), and SDG 15 (Life on land) in Robeco's SDG Framework. While the sum of sustainable investments with an environmental objective and socially sustainable investments always adds up to the Subfund's minimum proportion of 50% sustainable investments, we do not commit to a minimum share of sustainable investments with an environmental objective because the Sub-fund's investment strategy does not have a specific environmental investment objective. Therefore, the minimum share of sustainable investments with an environmental objective is 0%.

Wat is het minimaal aandeel van sociaal duurzame beleggingen?

The Sub-fund intends to make sustainable investments, measured as positive scores via Robeco's SDG Framework. Among those could be investments with social objectives. While the sum of socially sustainable investments and sustainable

investments with an environmental objective always adds up to the Sub-fund's minimum proportion of 50% sustainable investments, we do not commit to a minimum share of socially sustainable investments because the Subfund's investment strategy does not have a specific socially sustainable investment objective. Therefore, the minimum share of socially sustainable investments is 0%.
